Hazards Identification	Hazarde Identification		

Under normal condition of use of the batteries, the electrode materials and the liquid electrolyte they contained are non-reactive provided the battery integrity is maintainted.

Risk of exposure exists only in case of mechanical, electrical or thermal abuse. Thus the batteries should not short circuited, recharged, punctured, incinerated, crushed, immersed in water, force discharged or exposed to temperatures above the temperature range of the cell or battery. In these cases there is risk of fire or explosion.

Material - Safety - Data Sheet (MSDS) for

No.4

Ansmann Lithium-Manganese-Dioxide (Li-metal) Batteries

single cells and multi-cell battery packs

2/7

Composition and Informations on Ingredients 3.

Each cell consists of a hermetically sealed metallic container containing a number of chemicals and materials of construction of which the following could potentially be hazardous upon release.

Ingredient	Content	CAS No.		CHIP CI	assification
Lithium (Li)	2 - 5%	7439-93-2		RAOSIVE	F;C R14/15; R34 S43C; S45; S8
Manganese Dioxide (MnO ₂)	15 - 45%	1313-13-9	×		Xn R20/22 S25
Propylene Carbonate	<10%	108-32-7	×		Xi R36 S24/25
1,2-Dimethoxyethane	<10%	110-71-4			F;T R11; R19; R20; R60; R61 S45; S53
Lithium trifluoromethyl sulfonate (only Photo Batteries)	<5%	33454-82-9	×		Xi R36/37/38 S26; S37/39
Lithium Perchlorate (only Button Cells)	<1%	7791-03-9	*	K	O; Xn R20/22; R36/37/38; R9 S17; S26; S27; S36/37/38
Graphite, synthetic (only Button Cells)	3 - 10%	7440-44-0			S22; S24/25
stainless steel	30 - 75%	7439-89-6			
plastic	0 -10%

First Aid Measures					
L. L. J. P	D				

4.

Inhalation:	Provide fresh air. In severe cases obtain medical attention.
Skin Contact:	Wash off skin thoroughly with water. Remove contaminated clothing and wash before re-use. In severe cases obtain medical attention.
Eye Contact:	Irrigate thoroughly with water for at least 15 minutes. Lifting upper and lower lids, until no evidence of the chemical remains. Obtain medical attention.
Ingestion:	Wash out mouth thoroughly with water. Do not induce vomiting or give food or drink. Seek medical attention immediately.
Further treatment:	All cases of eye contamination, persistent skin irritation and casualities who have swallowed this substance or been affected by breathing its vapours should be seen by a doctor.

5. **Product and Supplier Identification**

CO₂ extinguishers or, even preferably, copious quantities of water or water-based foam, can be used to cool down burning Li- MnO₂ cells and batteries, as long as the extent of the fire has not progressed to the point that the lithium metal they contain is exposed (marked by deep red flames). Do not use for this purpose sand, dry powder or soda ash, graphite powder or fire blankets.

Use only metal (Class D) extinguishers on raw lithium.

Extinguishing media

Use water or CO₂ on burning Li-MnO₂ cells or batteries and class D fire extinguishing agent only on raw lithium.

Material - Safety - Data Sheet (MSDS)

for Ansmann Lithium-Manganese-Dioxide (Li-metal) Batteries single cells and multi-cell battery packs No.4

3/7

6. Accidental Release Measures

Remove personnel from area until fumes dissipate. Do not breathe vapours or touch liquid with bare hands.

If the skin has come into contact with the electrolyte, it should be washed thoroughly with water.

Sand or earth should be used to absorb any exuded material. Seal leaking battery and contaminated absorbent material in plastic bag and dispose of as Special Waste in accordance with local regulations.

7. Precautions for safe Handling and Use

1	7. <u>Precautions for safe Hand</u>	and use	
	Storage:	Store in a cool (preferable below 30°C), well ventilated area, away from moisture, sources of heat, open flames, food and drink. Elevated temperatures can result in shortened battery life. Temperautes above 100°C may result in battery leakage and rupture. In locations that handle large quantities of lithium batteries, such as warehouses, lithium batteries should be isolated from unnecessary combustibles. Keep batteries in original packaging until use and do not jumble them.	
	Mechanical Containment:	If potting or sealing the battery in an airtight or watertight container is required,	
	Containinent.	consult Ansmann AG representative for precautionary suggestions. Do not obstruct safety release vents on batteries. Encapsulation of batteries will not allow cell venting and can cause high pressure rupture.	
	Handling:	Accidental short circuit for a few seconds will not seriously affect the battery. Prolonged short-circuit will cause the battery to lose energy, generate significant heat and cause the safety vent release vent to open. Sources of short-circuits include jumbled batteries in bulk containers, metal jewelry, metal covered tables or metal belts used for assembly of batteries into devices. Damaging a lithium battery may result in an internal short circuit.	
		ry, including a vented battery, when exposed to water, may result in a fire and / or ed batteries may result in a fire.	
	If soldering or welding to the battery is required, consult your Ansmann representative for proper precautions prevent seal damage or short-circuit.		
	Charging:	Do not charge this batteries! This battery type is manufactured in a ready-to-use-state. It is not designed for recharging.	
		leakage, or in some cases, can cause the safety release vent to open. r if a battery is installed backwards.	
	Disposal:	Dispose in accordance with all applicable federal, state and local regulations.	
8	3. Special Protection Inform	ation	
	Ventilation Requirements:	Not necessary under normal conditions. Room ventilation may be required in areas where there are open or leaking batteries.	
	Respiratory Protection:	Not necessary under normal conditions. Avoid exposure to electrolyte fumes from open or leaking battery. In all fire situations, use self-contained breathing apparatus	
	Eye Protection:	Not necessary under normal conditions. Wear safety glasses with side shields if handling an open or leaking battery.	
	Hand Protection:	Not necessary under normal conditions. Use neoprene or natural rubber gloves if handling an open or leaking battery	
	Other:	Not necessary under normal conditions. Use chemical apron in case of leakage
